

Determining SVOD Brand Identity and Audience Appeal

Zeal Akula, Rufin Perez, Mel Runser, Hunter Stilwell, and Toby Wong

Introduction

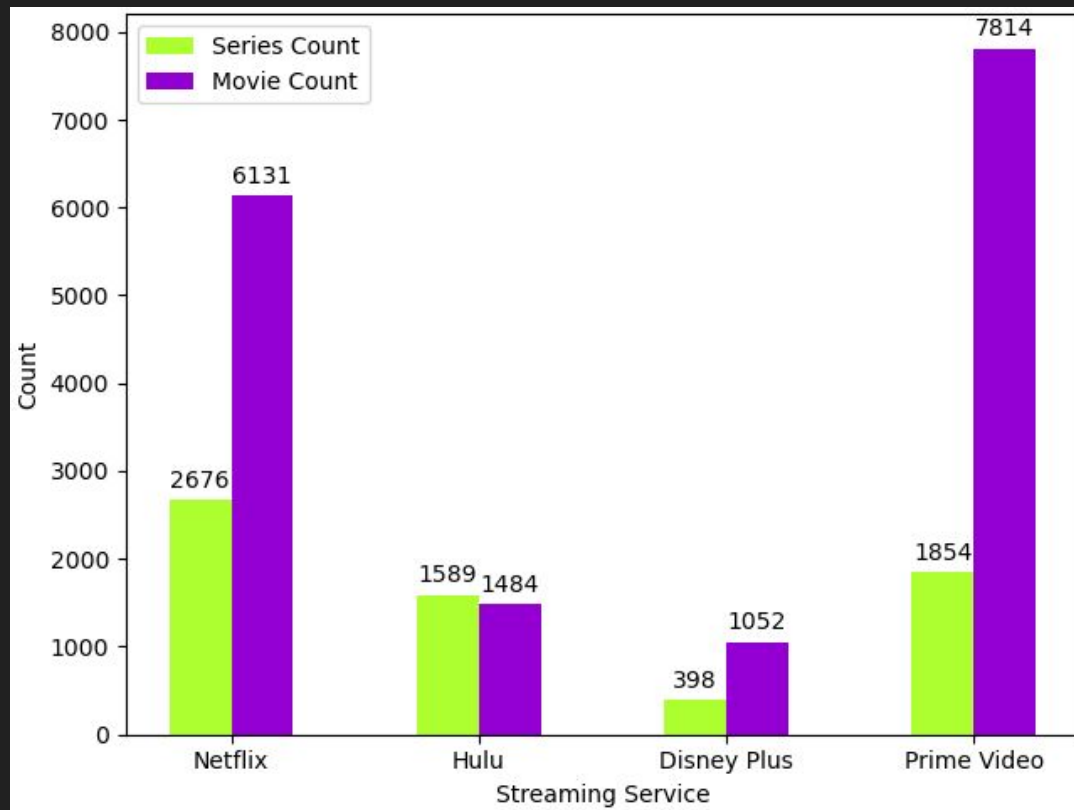

- The Streaming Video on Demand (SVOD) market has been becoming increasingly saturated as production companies seek to profit of their own content.
- Of all the available options, Netflix, Prime Video, and Hulu had the greatest viewership shares, respectively, in the first half of 2023 (Stoll, 2023).
- Particularly in the face of inflation, consumers who are subscribed to multiple platforms will start cutting back.
- **Null Hypothesis:** There is no connection between the content on a streaming service and its brand identity, and its wider appeal to its target audience.

Agenda

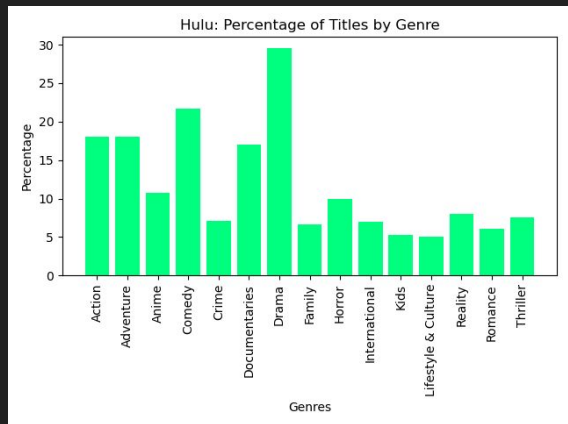

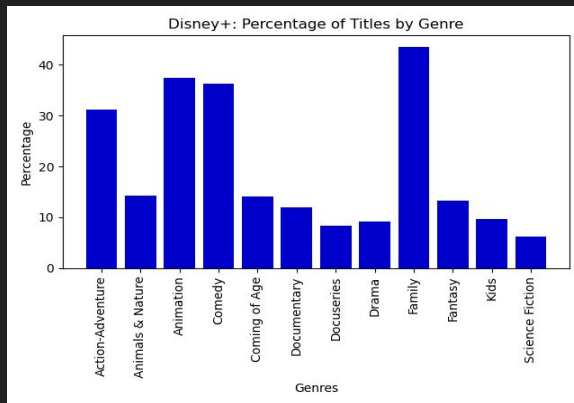

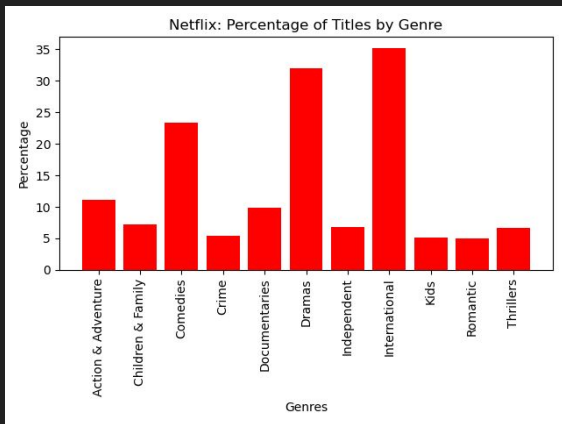

- I. Assessing the Content Offered on Each Platform
- I. Assessing How Well the Content Offered on Each Platform Aligns with Audience Interest
 - A. Examining Potential Opportunities for SVOD services to capture a greater share of the market.
- II. Broad Overview of How Successful Each Platform's Content Library Is
- III. Conclusion

Streaming Service Content by Type

- Comparison of movies and series added to streaming services
- There are more movies added than series for every streaming service, except Hulu
- Disney Plus and Hulu have added the least amount of content

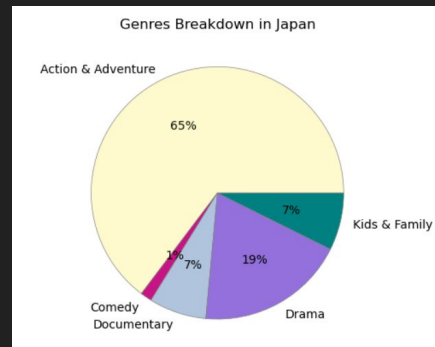

Streaming Service Content by Genre

- Comparison of genres found on different streaming services
- Genres on the charts include at least 5% of the total amount of titles
- Drama is the largest, or second largest, genre on every streaming service, except Disney+
- Around 35% of titles on Netflix are International
- Over 40% of titles on Disney+ are Family

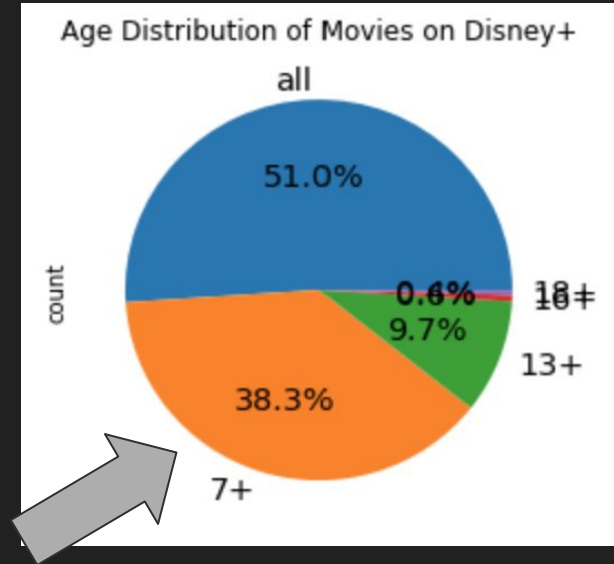

Sampling of Streaming by Service & Country

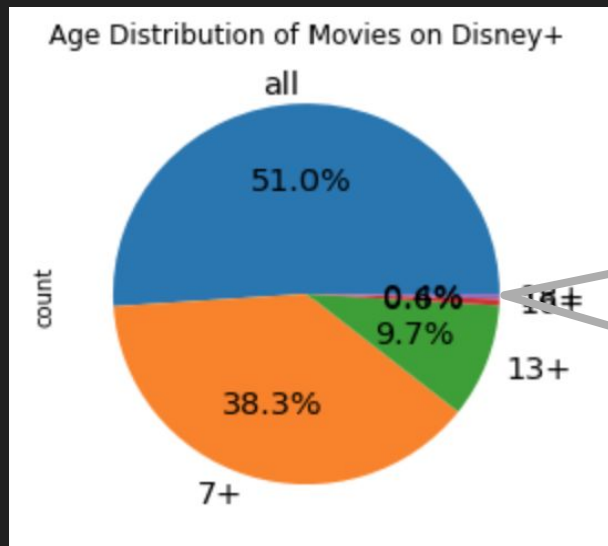

Age Distribution of TV Shows on each Platform

Age Distribution of Movies on each Platform

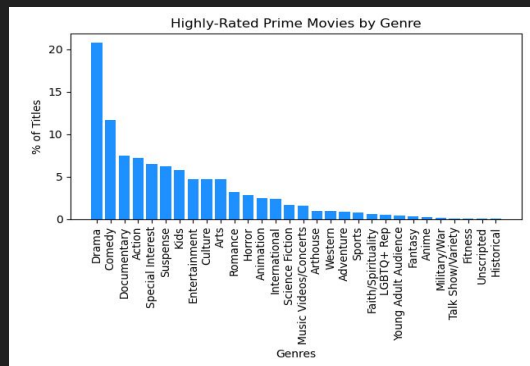

If you're Wondering...

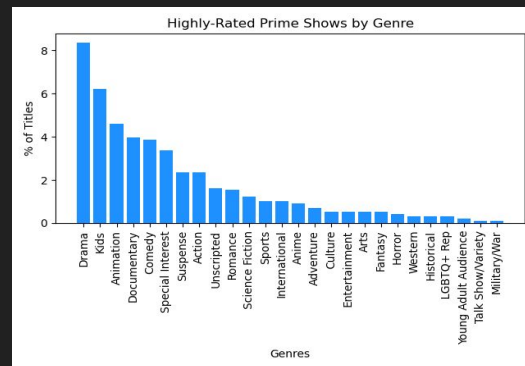

4131	4131	4132	The Kid	2019	18+
7653	7653	7654	The Swap	1979	18+
8985	8985	8986	Maggie Simpson in The Force Awakens from Its Nap	2021	18+

Does Highly-Rated Content Reflect the Most-Populated Genres?

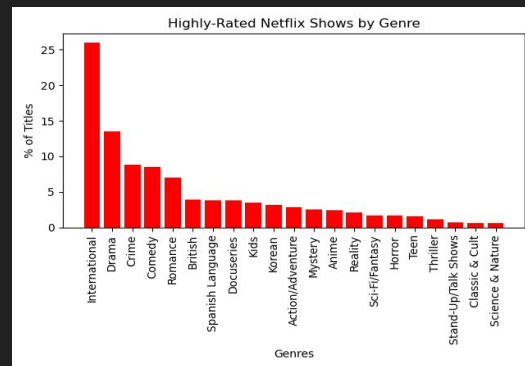

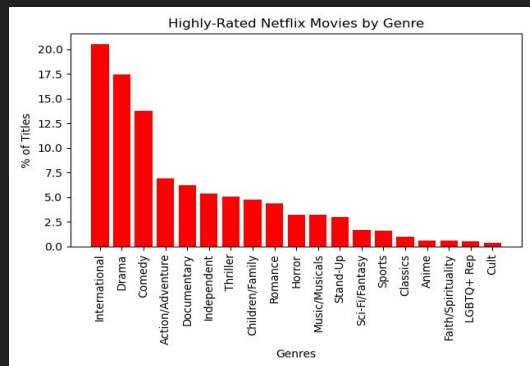

Overwhelmingly, yes.

- Appears that Prime Video and Netflix are very similar in terms of content libraries.

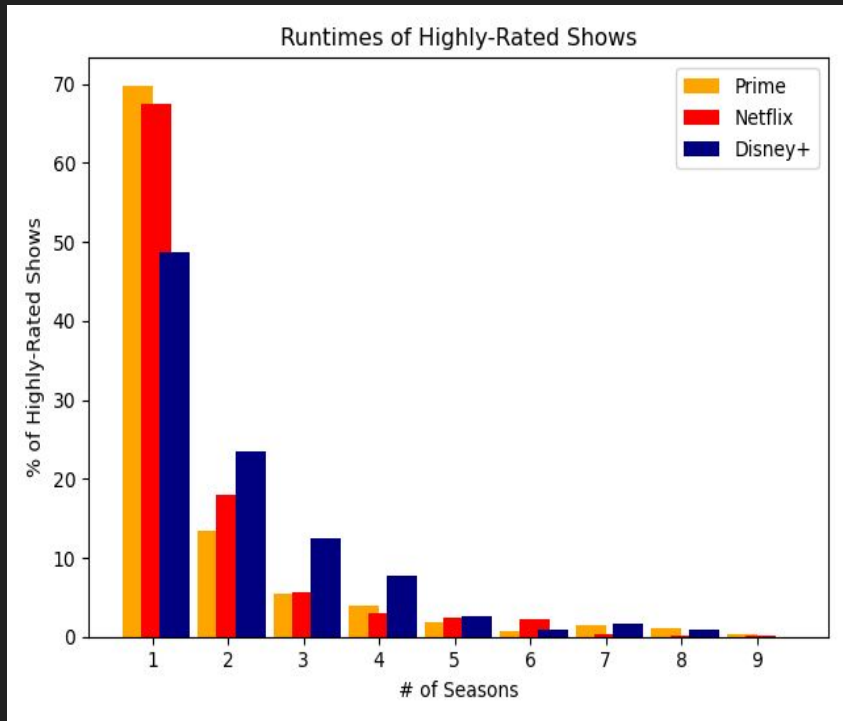

- Led to another question- *“How much impact does Netflix’s “International” acquisitions/productions have on its competitive advantage?”*

Netflix's “International” Differentiation Advantage

Are SVODs Effective at Identifying and Maintaining “Cash Cows”?

- More specific avenue to determine whether platforms can effectively assess audience preferences in real-time
- Can be critical to brand identity and the general sentiment of users on the platform
- Important to consider the timeframe for when the 2nd season of a show is greenlit or axed

What is overall quality of content based on viewer ratings?

1. **Overall quality of content** inferred from “Overall Vote Average”

- **Highest 7.03** - Disney TV Shows
- **Lowest 5.74** - Prime TV Shows

Higher numbers = better viewer ratings

2. **Popularity Count %** represents the % of popular content

- **Highest 62.77%** - Netflix TV Shows
➢ Disney TV Shows close - 62.57%

High rate of content marked popular

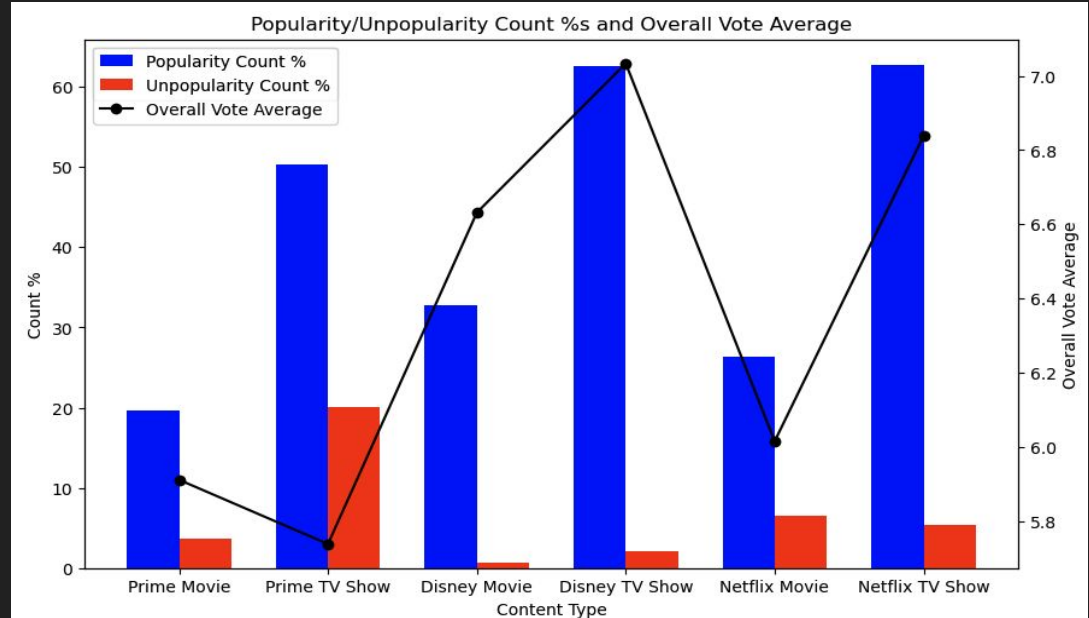

3. **Unpopularity Count %** represents the % of unpopular content

- **Lowest 0.68%** - Disney Movies

Small fraction of content marked unpopular

4. **Summary:**

- **Disney TV Shows** offer **highest** quality content, followed closely by Netflix TV Shows
- **Prime content** has the lowest overall vote average - **lower** viewer rating **quality**

	Type	Popular Count	Unpopular Count	Total Count	Popularity Count %	Unpopularity Count %	Overall Vote Average
0	Prime Movie	1292	239	6571	19.66	3.64	5.911152
1	Prime TV Show	275	110	547	50.27	20.11	5.738009
2	Disney Movie	339	7	1033	32.82	0.68	6.631720
3	Disney TV Show	234	8	374	62.57	2.14	7.033741
4	Netflix Movie	995	244	3775	26.36	6.46	6.015155
5	Netflix TV Show	543	46	865	62.77	5.32	6.838901

What is overall quality of content based on viewer ratings? (continued)

Category	LowerQ	UpperQ	IQR	LowBnd	UpBnd	Min	Max
